

Kenneth Critchfield

Matthew Heimburger

Accepted as Delegates for Science Symposium

Wave

Wasatch High School Feb. 26 (LRJ) Principal Kent Larsen released information that both Kenneth Critchfield and Matthew Heimburger of Wasatch High School have been accepted as delegates for the Intermountain Junior Science and Humanities Symposium.

The activity will take place March 20-23 at the University of Utah. The symposium is in cooperation with the U.S. Army Research Office, Dugway Proving Ground and the Academy of Applied Science.

The twenty-third symposium is a three day program for high school students and their science teachers and is concerned with research in science-related areas, including engineering and mathematics.

The six intermountain states—Utah, Colorado, Wyoming, Montana, Idaho and Nevada—are assigned student and teacher quotas based on past participation, interest, and the amount of funding available. Food, lodging, and related symposium costs are

covered for delegates officially assigned by the State School Office (Cost per each delegate is \$130.) Student delegates must have a cumulative gpa of 3.0 on a 4.0 scale.

Delegates will stay at the Temple Square Hotel and will be bussed to the University each day.

Participants are encouraged to submit papers detailing original research projects. Seniors and previous attendants are required to submit papers as a basis of their acceptance to the symposium.

The 24 best papers as selected by the Research Paper Committee will be presented orally by the student researchers at the symposium. The five best will receive awards and will be sent free as a delegate to the National Junior Science and Humanities Symposium in May 1985. One national delegate will have a chance to present his or her paper there in competition for a trip to the International Youth Science Symposium during the summer of 1985.

ner Legislation

by Dennis Hinkamp

Vehicles Warranties. More commonly known as "Lemon Laws" in other states, this act helps protect consumers from chronically defective new motor vehicles. For instance, a car that had to spend more than 30 days in the repair shop during the first year of warranty could be declared a "lemon." The new act would require the auto manufacturers to either give the consumer a replacement or a refund for the defective vehicle.

HOUSE BILL 17: Food Stamp I.D. This simply states that food stamp recipients be issued a photo identification card that must be presented whenever

they make a food stamp purchase. The act is designed to cut down on food stamp fraud.

HOUSE BILL 63: Class Size Reduction Program. Better known as the "soda pop tax," this act provides for taxation of soft drinks. The five cents per gallon tax revenue would go to the kindergarten through third grade education system. The purpose is to reduce the teacher to student ratio. It is estimated that the revenue generated would reduce the pupil/teacher ratio by .5 the first year.

If you have any individual interest in supporting one of these bills, write representative.

ch Menu

sandwich, cheese wedge, golden brown French fries, set jello w/banana and pineapple, cookie and milk.

March 7th - Meat loaf, whipped potatoes, buttered mixed vegetables, pineapple tidbits, rolls, butter and milk.
